Re: In the Matter of C.E. Flushing, LLC, Flushing, New York  
Request for Approval for Risk-Based Clean-up/Disposal of  
Polychlorinated Biphenyl Remediation Waste

Dear Mr. Perez:

I am senior vice-president and general counsel to Flushing Town Center III, L.P., the current owner of the above-referenced site and write in response to your January 10, 2008 letter to Jennifer Coghlan, Esq. I respectfully request that the name of the entity seeking approval be changed from C.E. Flushing, LLC to Flushing Town Center III, L.P. The approval should be directed to:

Flushing Town Center III, L.P.  
118-35 Queens Boulevard  
Forest Hills, New York 11375  
ATTN: Joshua L. Muss, Manager

A copy of the deed from C.E. Flushing, LLC to Flushing Town Center III, L.P., dated April 4, 2007, is enclosed herewith.

AKRF, Inc. is the technical representative for Flushing Town Center III, L.P. As explained in the enclosed letter from Michelle Lapin, P.E., and Kathleen Brunner of AKRF, the information previously submitted is still applicable and relevant.

We look forward to receiving the Agency's approval shortly. Please contact me or Ms. Coghlan if you require any further information.

Sincerely,

A handwritten signature in cursive script, appearing to read "Michael Seidenwar".

Re: Response to Comments  
PCB Remediation – Risk-Based Confirmation Under 40 CFR § 761.61(c)  
Flushing Industrial Park  
College Point Boulevard and 40<sup>th</sup> Road, Flushing, New York

Dear Mr. Perez:

AKRF Engineering, P.C. (AKRF) is in receipt of your letter to Sive, Paget & Riesel, PC dated January 10, 2008 regarding the risk-based PCB remediation performed under the supervision and with the approval of the New York State Department of Environmental Conservation (NYSDEC) at the above-referenced site. AKRF represented C.E. Flushing, LLC during remedial activities and continues to represent the site owner of the real property, as the ownership entity has changed.

Documents previously submitted to the United States Environmental Protection Agency (USEPA) related to this project included correspondence dated December 8, 2006, October 26, 2006, August 22, 2006 and September 1, 2005. The information contained in these previous submittals is still applicable and relevant to the request for USEPA's confirmation that the remediation performed on the Flushing Industrial Park site constitutes an appropriate risk-based approach to PCB remediation.

Since December 2006, additional site excavation and grading has been performed as part of site redevelopment. All post-remediation soil disturbance activities in areas of residual PCBs are monitored by AKRF for general oversight, documentation of soil handling procedures, and monitoring of worker and community health and safety. The limited areas with residual PCB contamination with concentrations greater than 10 ppm (as outlined in our correspondence to USEPA on October 26, 2006) continue to be located at depth beneath a minimum of two (2) feet of clean fill which meets the Site-Specific Action Levels; in addition, concrete pile caps and building slabs or asphalt pavement have been placed over much of the western ⅔ of the site where the residual PCBs are located. As part of the final development, all areas of residual contamination will be covered with a total of at least four (4) feet of clean fill, concrete and/or asphalt associated with the new development.

In December 2007, the NYSDEC granted Certificates of Completion (COCs) for each of the three development Parcels (Parcels 1, 2 and 3). The COCs are NYSDEC confirmation that remediation

requirements to address contamination at Flushing Industrial Park, Parcels 1, 2 and 3 have been achieved under the Brownfield Cleanup Program. The NYSDEC also approved Parcel-specific Site Management Plans (SMPs) which address potential residual contamination in on-site groundwater, soil and soil gas. With implementation of the SMPs, Parcels 1, 2 and 3 will remain protective of human health and the environment. Environmental easements were recorded for Parcels 1, 2 and 3 to ensure proper implementation of the SMPs.

Please call Kate Brunner at 646-388-9525 if you have any questions.

Sincerely,  
AKRF Engineering, P.C.
